"Pretty....Yet Deadly" Plant Guide

Toxic plants found in your yard or home that can be toxic, even fatal to your new puppy, or grown dog

Presented by Jim Burwell

"Pretty...Yet Deadly" Guide

This might not seem important to you, but as a responsible puppy owner----- please listen.

One of our long time clients lost their beautiful little Cavalier King Charles puppy, Charlie, because he ate a piece of the "pod" from a Sago Palm.

He was gone before they could even get him to the vet.

It might take eating a lot of the plant BUT it might only take eating just a little.

Please be safe, not sorry. **Remember if your puppy or dog goes visiting at a neighbor's house, check their plants also**

It's our pleasure and our duty, to provide you with this list of common household and yard plants that can cause harm to your puppy OR dog.

Please feel free to share it with family and friends.

Jim Burwell, Inc.
